Functional unit: 6 formalwear uses for one NUS student over one year
Environment
Functional output:
formalwear service
System boundary
Transport support
Delivery (purchases)
Collection / return (rental)
Manufacturing
Distribution /
retail
Use
End-of-life treatment
Collection / incineration
Background supply
Materials, energy and water
Embedded in stage factors
Cleaning
Input flows
Primary resources
(including energy resources)
Water
Output flows (all stages)
GHG emissions to air
(e.g., CO_2, CH_4, N_2O)
Garment / service flow
Background supply / environmental flow
Impact indicator: kg CO_2e per functional unit
